I then started constructing a musical composition that would create that mood, with all the doom, mystery, and darkness necessary. So it was not actually up to Rasmus to resolve to a melody, but rather up to the story we

wanted to tell. To visualize all the ideas, I played as many of my favorite soundtracks and film scores as I could; also, I listened to music from the STARGATE universe to help me create my own version. My goal was to have a score that expressed and embodied the themes and moods of The Awakening of Filia as I wanted them to sound.

**# milestone 1: Googlers, deadline Monday, Feb 21st. Gobby started to release milestones conceptually at the time of Google Froyo and Chrome (non-mobile release). So we have 'milestone-one' which is a complete game, using all three of the first three parts of the development process. (So it's conceptual nearly-end-of-year for us, but it finishes mid-year for them if they finish this month.) This milestone will result in an alpha to milestone one of the game. (However, game-wise, it is only partial - milestone one consists of the green-shootable bits - since in one sense we are expecting to include all of the parts required for the final game.) The 'allowable' bugs reported must fall under a threshold of one reasonable patch a day to uphold the guideline of being incremental, and the code must be able to be**
