You can use _lossless_ image formats to store your digital images, but the resulting files will be _bigger_ because they contain a lot of information that your computer might not need. But a smaller file size can be beneficial to your image's quality and to how easily it displays on a computer screen or displays in large formats. ## TIFF, RAW, JPEG, and More _Lossless_ or _lossy_ is the colloquial way to describe _lossy_ formats_ such as .jpg and .tif. What's New In Adobe Photoshop Cs6 Download Exe?

One of the things that sparked Tony's interest in and passion for speedball were the shared events that were organized by the members of the Old Men's League. While his brothers and cousins would get together for baseball, Tony got together with the guys from Old Men's League for a full week each year to play a head to head game called "Flip City". A coin toss determined who's team would be flip. Tony's team would always win. Tony and the guys from OML also used to rent or borrow a large room at the monastery, and they would have a grand time playing after dinner, with the laughter and camaraderie that only a speedball game can provide. Tony never missed a party; he was always at the edge of the group, but never the part. He loved the "straddleers" games, those were the best. Tony was one of the first people I ever met at the monastery. He was a big man, very physical, but was not shy at all. Tony and I met at a youth group party where he was in charge of entertainment, and of course, he had a steady supply of beer. I think Tony had the nickname "Gimpy" because he walked with a limp, or a limp might have just given him his wise-ass attitude. Tony was diagnosed with Parkinsons a few years ago, and the more he drank, the more the disease advanced. Tony was a large part of my life, before, during and after residency in the monastery. I am still awed by the amount of great memories, good friends and laughter I have from Tony and the OML. I miss Tony. Today is Tony's birthday. He would have been 58 years old. He was a friendly man, with a good sense of humor, and a sharp tongue. He liked to tell the nurses at the hospital what he wanted, and who was to eat his food. Tony will be missed, but his memories and spirit live on.Q: Json object to be sent in request parameter How do I send a JSON object as request parameter in form of javascript object to java servlet?
